

REPORT TO GOVERNANCE AND AUDIT COMMITTEE

REPORT OF: HEAD OF FINANCE

REPORT NO: HOF228

DATE: 14th March 2013

TITLE:	Statement of Accounting Policies 2012/13	
KEY DECISION OR POLICY FRAMEWORK PROPOSAL:	None	
PORTFOLIO HOLDER: NAME AND DESIGNATION:	Cllr Mike Taylor Strategic Resources and Well Run Council	
CONTACT OFFICER:	John Carpenter Year End Accountant j.carpenter@southkesteven.gov.uk Telephone (01476) 406218	
INITIAL IMPACT ANALYSIS: Equality and Diversity	Carried out and Referred to in paragraph (7) below N/A	Full impact assessment Required: N/A
FREEDOM OF INFORMATION ACT:	This report is publicly available via the Your Council and Democracy link on the Council's website: www.southkesteven.gov.uk	
BACKGROUND PAPERS		

1. RECOMMENDATION

It is recommended that Governance & Audit Committee approve the Statement of Accounting Policies to be used in the production of the 2012/13 financial statements.

2. PURPOSE OF THE REPORT

The Code of Practice on Local Authority Accounting in the United Kingdom 2012-13 (The Code) does not require the disclosure of any new accounting policies however a new policy for foreign currency transactions is included for completeness

The policies have been reviewed and revised with reference to the model form of accounting policies contained in the Code. There have been no substantive changes in the accounting policies however policies have been brought into line with the model form and adjusted to reflect local circumstances.

When changes are made to the policies, it is a requirement that these are reported to those charged with governance.

3. DETAILS OF REPORT

The 2012/13 Statement of Accounts will summarise the Council's transactions for the 2012/13 financial year and its position at the year-end of 31 March 2013. It will be prepared in accordance with the *Code of Practice on Local Authority Accounting in the United Kingdom 2012-13* (The Code) which is based on International Financial Reporting Standards (IFRS). The accounting convention adopted is historical cost, modified by the revaluation of certain categories of non-current assets.

The Code does not require any new accounting policies to be applied in 2012/13 however a policy not previously included has been added concerning Foreign Currency Transactions for completeness. .

All other accounting policies have been reviewed for the 2012/13 financial year to ensure that they comply with The Code, are more accurately reflective of the transactions that have occurred and that they have been applied consistently. The recommended policies are more closely aligned with the model set of accounting policies included in the Code while reflect whilst providing further clarification where it seems appropriate.

The substantive changes and variations between the model set of accounting polices and the recommended Council polices are as follows:

- a. Polices in respect of accounting regulations not appropriate to the Council and therefore not included:
 - Acquisitions and Discontinued Operations
 - Interests in Companies and Other Entities
 - Jointly Controlled Operations and Jointly Controlled Assets
 - Private Finance Initiative (PFI) and Similar Contracts
- b. Policies in respect of accounting regulations with significant additions and omissions to reflect the financial arrangements of the Council:
 - Financial Instruments. The proposed policy reflects the Council's borrowing and lending policy.

- Property, Plant and Equipment .The policies for componentisation of assets and a de-minimis level for the recognition of capital expenditure are retained and there is no policy for donated assets to reflect the Council’s position.
- c. Additional Policy recommended:
- Foreign Currency Transactions
- d. Locally developed policy included
- Heritage Assets. The existing policy reflects the limited scale of heritage assets held by the Council
- e. Local policies not included in code
- Principal and Agent Transactions

4. OTHER OPTIONS CONSIDERED

4.1 None

5. RESOURCE IMPLICATIONS

5.1 None

6. RISK AND MITIGATION

Risk has been considered as part of this report and any specific high risks are included in the table below:

Category Risk	Action / Controls
None identified	

7. ISSUES ARISING FROM IMPACT ANALYSIS

7.1 N/a

8. CRIME AND DISORDER IMPLICATIONS

8.1 N/a

9. COMMENTS OF FINANCIAL SERVICES

Prior to the compilation of the statement of accounts for 2012/13 it is important that members of Governance and Audit Committee have the opportunity to discuss and comment on the accounting policies to be used in the production of the financial statements. These policies if agreed, will be applied to the treatment of all transactions that make up the figures in the Statement of Accounts to ensure that the accounts present a true and fair view of the financial position of the Council at the balance sheet date and of its income and expenditure for the financial year.

10. COMMENTS OF LEGAL AND DEMOCRATIC SERVICES

The policies referred to in this report are procedures and guidance and not formal policies adopted by the Council as policy development framework or key decisions made as a matter of local choice. As such there is no formal process for updating and amending. As a matter of good practice, any updates and amendments should be reported to Governance and Audit Committee in accordance with their role to consider whether appropriate accounting policies have been followed.

11. COMMENTS OF OTHER RELEVANT SERVICES

11.1

12. APPENDICES:

1. Statement Of Accounting Policies

STATEMENT OF ACCOUNTING POLICIES

I. GENERAL PRINCIPALS

The Statement of Accounts summarises the Council's transactions for the 2012/13 financial year and its position at the year-end of 31 March 2013. The Council is required to prepare an annual Statement of Accounts by the Accounts & Audit (England) Regulations 2011, which those regulations require to be prepared in accordance with proper accounting practices. These practices primarily comprise the *Code of Practice on Local Authority Accounting in the United Kingdom 2012/13* and the *Service Reporting Code of Practice 2012/13*, supported by International Financial Reporting Standards (IFRS).

The accounting convention adopted in the Statement of Accounts is principally historical cost, modified by the revaluation of certain categories of non-current assets and financial instruments.

II. ACCRUALS OF INCOME AND EXPENDITURE

Activity is accounted for in the year that it takes place, not simply when cash payments are made or received. In particular:

- Revenue from the sale of goods is recognised when the Council transfers the significant risks and rewards of ownership to the purchaser and it is probable that economic benefits or service potential associated with the transaction will flow to the Council.
- Revenue from the provision of services is recognised when the Council can measure reliably the percentage of completion of the transactions and it is probable that economic benefits of service potential associated with the transaction will flow to the Council.
- Supplies are recorded as expenditure when they are consumed – where there is a gap between the date supplies are received and their consumption they are carried as inventories on the Balance Sheet.
- Expenses in relation to services received (including services provided by employees) are recorded as expenditure when the services are received rather than when payments are made.
- Interest receivable on investments and payable on borrowings is accounted for respectively on the basis of the effective interest rate for the relevant financial instrument, rather than the cash flows fixed or determined by the contract.
- Where revenue and expenditure have been recognised but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet. Where debts may not be settled, the balance of debtors is written down and a charge made to revenue for the income that might not be collected.

III. CASH AND CASH EQUIVALENTS

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty or notice of not more than 24 hours. Cash equivalents are highly liquid investments that mature in 30 days or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value.

In the Cash Flow Statement, cash and cash equivalents are shown net of bank overdrafts that are repayable on demand and form an integral part of the Council's cash management.

IV. EXCEPTIONAL ITEMS

When items of income and expense are material, their nature and amount is disclosed separately, either on the face of the Comprehensive Income and Expenditure Statement or in the notes to the accounts, depending on how significant the items are to an understanding of the Council's financial performance.

V. PRIOR PERIOD ADJUSTMENTS, CHANGES IN ACCOUNTING POLICIES & ESTIMATES AND ERRORS

Prior period adjustments may arise as a result of a change in accounting policies or to correct a material error. Changes in accounting estimates are accounted for prospectively, i.e. in the current and future years affected by the change and do not give rise to a prior period adjustment.

Changes in accounting policies are only made when required by proper accounting practices or the change provides more reliable or relevant information about the effect of transactions, other events and conditions on the Council's financial position or financial performance. Where a change is made, it is applied retrospectively (unless stated otherwise) by adjusting opening balances and comparative amounts for the prior period as if the new policy had always been applied.

Material errors discovered in prior period figures are corrected retrospectively by amending opening balances and comparative amounts for the prior period.

CHARGES TO REVENUE FOR NON-CURRENT ASSETS

Services, support services and trading accounts are debited with the following amounts to record the real cost of holding non-current assets during the year.

- Depreciation attributable to the assets used by the relevant service.
- Revaluation and Impairment losses on assets used by the service where there are no accumulated gains in the Revaluation Reserve against which they can be written off.
- Amortisation of intangible assets attributable to the service.

The Council is not required to raise council tax to fund depreciation, revaluation and impairment losses or amortisation. However, it is required to make an annual contribution from revenue towards the reduction in its overall borrowing requirement equal to an amount calculated on a prudent basis determined by the Council in accordance with statutory guidance. Depreciation, revaluation and impairment losses and amortisation are therefore replaced by the contribution in the General Fund Balance by way of an adjusting transaction

with the Capital Adjustment Account in the Movement in Reserves Statement for the difference between the two.

VI. EMPLOYEE BENEFITS

Benefits Payable during Employment

Short-term employee benefits are those due to be settled within 12 months of the year end. They include such benefits as wages and salaries, paid annual leave and paid sick leave, bonuses and non monetary benefits for current employees and are recognised as an expense for services in the year in which the employees render service to the Council. An accrual is made for the cost of holiday entitlements (or any form of leave, e.g. time off in lieu) earned by employees but not taken before the year-end which employees can carry forward into the next financial year. The accrual is made at the wage and salary rates applicable in the following accounting year, being the period in which the employee takes the benefit. The accrual is charged to Surplus or Deficit on the Provision of Services, but then reversed out through the Movement in Reserves Statement so that benefits are charged to revenue in the financial year in which the holiday absence occurs.

Termination Benefits:

Termination benefits are payable as a result of a decision by the Council to terminate an officer's employment before the normal retirement date or an officer's decision to accept voluntary redundancy in exchange for those benefits. They are charged on an accruals basis to the appropriate service, or where applicable, to the Non Distributed Costs line in the Comprehensive Income and Expenditure Statement where the Council is demonstrably committed to the termination of the employment of an officer or group of officers or making an offer to encourage voluntary redundancy.

Where termination benefits involve the enhancement of pensions, statutory provisions require the General Fund Balance to be charged with the amount payable by the Council to the pension fund or pensioner in the year, not the amount calculated according to the pension fund or pensioner in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, appropriations are required to and from the Pensions Reserve to remove the notional debits and credits for pension enhancement termination benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year-end

Post-Employment Benefits

Employees of the Council are members of the Local Government Pension Scheme, administered by Lincolnshire County Council. The scheme provides defined benefits to members (retirement lump sums and pensions), earned as employees worked for the Council.

The Council recognises the cost of retirement benefits in the revenue account when employees earn them, rather than when the benefits are eventually paid as pensions.

Local Government Pension Scheme

The Local Government Scheme is accounted for as a defined benefit scheme:

- The liabilities of the Lincolnshire County Council pension scheme attributable to the Council are included in the Balance Sheet on an actuarial basis using the projected unit method – i.e. an assessment of the future payments that will be made in relation to the retirement benefits earned to date by employees, based on assumptions about mortality rates, employee turnover rates, etc, and projections of projected earnings for current employees. Financial assumptions are based on market expectations at the reporting date for the period over which they are to be settled. The scheme assets and liabilities are subject to a formal actuarial valuation every three years. Between these formal valuations, values are estimated at each balance sheet date using latest membership data.
- Liabilities are discounted to their value at current prices, using a discount rate calculated by the Actuaries (based on the indicative rate of return on the Bond yields and inflation rates).
- The assets of the Lincolnshire County Council pension fund attributable to the Council are included in the balance sheet at their fair value:
 - Quoted securities – current bid price
 - Unquoted securities – professional estimate
 - Unlisted securities – current bid price
 - Property - market value
- The change in the net pensions liability is analysed into seven components:
 - Current service cost – the increase in liabilities as a result of years of service earned this year – charged in the Comprehensive Income and Expenditure Statement to the revenue accounts of services for which the employees worked
 - Past service cost – the increase in liabilities arising from current year decisions whose effect relates to years of service earned in earlier years – debited to the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement as part of Non Distributed Costs
 - Interest cost – the expected increase in the present value of liabilities during the year as they move one year closer to being paid – debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.
 - Expected return on assets – the annual investment return on the fund assets attributable to the Council, based on an average of the expected long-term return – credited to the Financing & Investment Income & Expenditure line in the Comprehensive Income and Expenditure Statement.
 - Gains/losses on settlements and curtailments – the result of actions to relieve the Council of liabilities or events that reduce the expected future service or accrual of benefits of employees – debited or credited to the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement as part of Non-Distributed Costs

- Actuarial gains and losses – changes in the net pensions liability that arise because events have not coincided with assumptions made at the last actuarial valuation or because the actuaries have updated their assumption – charged to the Pensions Reserve.
- Contributions paid to the Lincolnshire County Council pension fund – cash paid as employer’s contributions to the pension fund in settlement of liabilities; not accounted for as an expense..

In relation to retirement benefits, statutory provisions require the General Fund balance to be charged with the amount payable by the Council to the pension fund or directly to pensioners in the year, not amount calculated according to the relevant accounting standards.

In the Movement in Reserves Statement, this means that there are appropriations to and from the Pensions Reserve to remove the notional debits and credits for retirement benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year-end. The negative balance that arises on the Pensions Reserve thereby measures the beneficial impact to the General Fund of being required to account for retirement benefits on the basis of cash flows rather than as benefits are earned by employees.

Discretionary Benefits

The council also has restricted powers to make discretionary awards of retirement benefits in the event of early retirements. Any liabilities estimated to arise as a result of an award to any member of staff are accrued in the year of the decision to make the award and accounted for using the same policies as are applied to the Local Government Pension Scheme.

VII. EVENTS AFTER THE REPORTING PERIOD

Events after the Balance Sheet date are those events, both favourable and unfavourable, that occur between the end of the reporting period and the date when the Statement of Accounts is authorised for issue. Two types of events can be identified :

- Those that provide evidence of conditions that existed at the end of the reporting period - the Statement of Accounts will be adjusted to reflect these.
- Those that are indicative of conditions that arose after the reporting period - the statement of Accounts is not adjusted to reflect such events, but where a category of events would have a material effect, disclosures is made in the notes of the nature of the event and an estimated financial effect.

Events taking place after the date of authorisation for issue are not reflected in the Statement of Accounts.

VIII. FINANCIAL INSTRUMENTS

Financial Liabilities

Financial Liabilities are recognised on the Balance Sheet when the Council becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value and carried at their amortised cost. Annual charges to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest payable are based on the carrying amount of the liability, multiplied by the effective rate of interest for the instrument. The effective interest rate is the rate that exactly discounts estimated future cash payments over the life of the instrument to the amount at which it was originally recognised

For all of the borrowing that the Council has, this means that the amount presented in the Balance Sheet is the outstanding principle repayable (plus accrued interest) and interest charged to the Comprehensive Income and Expenditure Account is the amount payable for the year in the loan agreement.

All current borrowing is with the Public Works Loan Board and the Council has no intention at present to make early settlement of these loans. Borrowing costs that relate to these loans are charged to the Comprehensive Income & Expenditure Account as they are incurred.

Financial assets are classified into two types:

- Loans & receivables – assets that have fixed or determinable payments but are not quoted in an active market.
- Available-for-sale assets – assets that have a quoted market price and/or do not have fixed or determinable payments.

Loans and Receivables

Loans and receivables are recognised on the Balance Sheet when the council becomes a party to contractual provisions of a financial instrument and are initially measured at fair value. They are subsequently measured at their amortised cost. Annual credits to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest receivable are based on the carrying amount of the asset multiplied by the effective rate of interest of the instrument. For all of the loans that the Council has made, this means that the amount presented in the Balance Sheet is the outstanding principle receivable (plus accrued interest) and interest credited to the Comprehensive Income & Expenditure Statement is the amount receivable for the year in the loan agreement.

When assets are identified as impaired because of a likelihood arising from a past event that payments due under the contract will not be made, the asset is written down and a charge made to the relevant service (for receivables specific to that service) or the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. The impairment loss is measured as the difference between the carrying amount and the present value of the revised future cash flows discounted at the asset's original effective interest rate.

Any gains and losses that arise on the de-recognition of the asset are credited or debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

Available-for-sale Assets

The Council does not hold any Available-for-Sale assets.

IX. FOREIGN CURRENCY TRANSACTIONS

Where the Council has entered into a transaction denominated in a foreign currency, the transaction is converted into sterling at the exchange rate applicable on the date the transaction was effective. Where amounts in foreign currency are outstanding at the year-end, they are reconverted at the spot exchange rate at 31 March. Resulting gains or losses are recognised in the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

GOVERNMENT GRANTS & OTHER CONTRIBUTIONS

Whether paid on account, by instalments or in arrears, government grants and third party contributions and donations are recognised as due to the Council when there is reasonable assurance that:

- The Council will comply with the conditions attached to the payments, and
- The grants or contributions will be received

Amounts recognised as due to the Council are not credited to the Comprehensive Income and Expenditure Statement until conditions attached to the grant or contributions have been satisfied. Conditions are stipulations that specify that the future economic benefits or service potentially embodied in the asset in the form of the grant or contribution are required to be consumed by the recipient as specified, or future economic benefits or service potential must be returned to the transferor.

Money advanced as grants and contributions for which conditions have been satisfied are carried in the Balance Sheet as creditors. When conditions are satisfied, the grant or contribution is credited to the relevant service line (attributable revenue grants and contributions) or Taxation and Non Specific Grant Income (non ring fenced revenue grants and all capital grants) in the Comprehensive Income and Expenditure statement.

Where Capital Grants are credited to the Comprehensive Income and Expenditure Statement they are reversed out of the General Fund Balance in the Movement in Reserves Statement. Where the grant has yet to be used to finance capital expenditure, it is posted to the Capital Grants Unapplied Reserve. Where it has been applied, it is posted to the Capital Adjustment Account. Amounts in the Capital Grants Unapplied reserve are transferred to the Capital Adjustment Account once they have been applied to fund capital expenditure

X. HERITAGE ASSETS

Heritage assets are held or maintained principally for their contribution to knowledge and culture. They are initially recognised at cost if this is available. If cost is not available, values are only included in the Balance Sheet where the cost of obtaining valuation is not disproportionate to the benefit derived. For most of the Council's heritage assets, insurance valuations are used. Where no market exists or the asset is deemed to be unique, and it is not practicable to obtain a valuation, the asset is not recognised in the Balance Sheet but disclosed in the notes to the accounts.

Heritage assets are depreciated over their useful life if this can be established. If an asset is considered to have an indefinite life, no depreciation is charged. Disposals, revaluation gains and losses and impairments of heritage assets are dealt with in accordance with the Council's policies relating to property, plant and equipment.

The cost of maintenance and repair of heritage assets is written off in the year incurred.

XI. INTANGIBLE ASSETS

Expenditure on non-monetary assets that do not have physical substance but are identifiable and controlled by the Council (e.g. software licences) is capitalised when it is expected that future economic benefits or service potential will flow from the intangible asset to the Council.

Expenditure on the development of the Council's website is not capitalised.

Intangible Assets are measured initially at cost. Amounts are only revalued where the fair value of the asset held by the Council can be determined by reference to an active market. In practice, no intangible asset held by the Council meets this criterion, and they are therefore carried at amortised cost. The depreciable amount of an intangible asset is amortised over its useful life to the relevant service line(s) in the Comprehensive Income and Expenditure Statement. An asset is tested for impairment whenever there is an indication that the asset might be impaired – any losses recognised are posted to the relevant service line(s) in the Comprehensive Income and Expenditure Statement. Any gains or losses arising on the disposal or abandonment of an intangible asset is posted to the Other Operating Expenditure Line in the comprehensive Income and Expenditure Statement.

Where expenditure on intangible assets qualifies as capital expenditure for statutory purposes, amortisation, impairment losses and disposal gains and losses are not permitted to have an impact on the General Fund Balance. The gains and losses are therefore reversed out of the General Fund Balance in the Movement in Reserves Statement and posted to the Capital Adjustment Account and (for any sale proceeds greater than £10,000) the Capital Receipts reserve.

The useful life of intangible assets is assessed by the Chief Finance Officer at the time of acquisition. Intangible assets are derecognised when no future economic benefits are expected from them.

XII. INVENTORIES AND LONG TERM CONTRACTS

Inventories are included in the Balance Sheet at the lower of cost and net realisable value.

Where the output of Long-term contracts is in the form of a service rather than goods, work in progress is measured at the cost of its production, primarily consisting of the labour and other personnel costs incurred in providing the service.

XIII. INVESTMENT PROPERTY

Investment properties are those that are used solely to earn rentals and/or for capital appreciation. The definition is not met if property is used in any way to facilitate the delivery of services or production of goods or is held for sale.

Investment properties are measured initially at cost and subsequently at fair value, based on the amount at which the asset could be exchanged between knowledgeable parties at arms-length. Properties are not depreciated but are revalued annually according to market conditions at the year end. Gains and losses on revaluation are posted to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. The same treatment is applied to gains and losses on disposal.

Rentals received in relation to investment properties are credited to the Financing and Investment Income line and result in a gain for the General Fund Balance. However revaluation and disposal gains and losses are not permitted by statutory arrangements to have an impact on the General Fund Balance. The gains and losses are therefore reversed out of the General Fund Balance in the Movement in Reserves Statement and posted to the Capital Adjustment Account and (for any sale proceeds greater than £10,000) the Capital Receipts Reserve.

XIV. LEASES

Leases are classified as finance leases where the terms of the lease transfer substantially all the risks and rewards incidental to the ownership of the property, plant or equipment from the lessor to the lessee. All other leases are classified as operating leases.

Where a lease covers both land and buildings, the land and buildings elements are considered separately for classification.

Arrangements that do not have the legal status of a lease but convey a right to use an asset in return for payment are accounted for under this policy where fulfilment of the arrangement is dependent on the use of specific assets

The Council as Lessee

Finance Leases:

Property, plant and equipment held under finance leases is recognised on the Balance Sheet at the commencement of the lease at its fair value measured at the leases inception (or the present value of the minimum leases payments, if lower). The asset recognised is matched by a liability for the obligation to pay the lessor e.g. payments net of financing costs. Initial direct costs of the Council are added to the carrying amount of the asset. Premiums paid on entry into the lease are applied to writing down the lease liability. Contingent rents are charged as expenses in the period in which they are incurred.

Lease payments are apportioned between:

- A charge for the acquisition of the interest in the property, plant or equipment – applied to write down the lease liability, and
- A finance charge (debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement).

Property, Plant and Equipment recognised under finance leases is accounted for using the policies applied generally to such assets, subject to depreciation being charged over the lease

term if this is shorter than the assets estimated useful life (where ownership of the asset does not transfer to the Council at the end of the lease period).

The Council is not required to raise council tax to cover depreciation or revaluation and impairment losses arising on leased assets. Instead a prudent annual contribution is made from revenue funds towards the deemed capital investment in accordance with statutory requirements. Depreciation and revaluation and impairment losses are therefore substituted by a revenue contribution in the General Fund Balance, by way of an adjusting transaction with the Capital Adjustment Account in the Movement in Reserves Statement for the difference between the two.

Operating Leases

Rentals paid under operating leases are charged to the Comprehensive Income and Expenditure Statement as an expense of the services benefitting from use of the leased property, plant or equipment. Charges are made on a straight line basis over the life of the lease, even if this does not match the patterns of payments (e.g. there is a rent free period at the commencement of the lease).

The Council as Lessor

Finance Leases

Where the Council grants a finance lease over a property or an item of plant or equipment, the relevant asset is written out of the Balance Sheet as a disposal. At the commencement of the lease, the carrying amount of the asset in the Balance Sheet (whether Property, Plant and Equipment or Assets Held for Sale) is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. A gain, representing the Council's net investment in the lease, is credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of disposal) matched by a lease (long term debtor) asset in the Balance Sheet.

Lease rentals receivable are apportioned between

- A charge for the acquisition of the interest in the property – applied to write down the lease debtor (together with any premiums received), and
- Finance income (credited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement)

The gain credited to the Comprehensive Income and Expenditure Statement on disposal is not permitted by statute to increase the General Fund Balance and is required to be treated as a capital receipt. Where a premium has been received, this is posted out of the General Fund Balance to the Capital Receipts Reserve in the Movement in Reserves Statement. Where the amount is due in relation to the lease asset is to be settled by the payment of rentals in future financial years, this is posted out of the General Fund Balance to the Deferred Capital Receipts Reserve in the Movement in Reserves Statement. When the future rentals are received, the element for the capital receipts for the disposal of the asset is used to write down the lease debtor. At this point, the deferred capital receipts are transferred to the Capital Receipts Reserve.

The written off value of disposals is not a charge against council tax, as the cost of non-current assets is fully provided for under separate arrangements for capital financing. Amounts are therefore appropriated to the Capital Adjustment Account from the General Fund Balance in the Movement in Reserves Statement.

Operating Leases

Where the Council grants an operating lease over a property or an item of plant or equipment, the asset is retained in the Balance Sheet. Rental income is credited to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Credits are made on a straight -line basis over the life of the lease, even if this does not match the pattern of payments (e.g. there is a premium paid at the commencement of the lease). Initial direct costs incurred in negotiating and arranging the lease are added to the carrying amount of the relevant asset and charged as an expense over the lease term on the same basis as rental income.

XV. OVERHEADS & SUPPORT SERVICES

The costs of overheads and support services are charged to those that benefit from the supply or service in accordance with the costing principles of the CIPFA *Service Reporting Code of Practice 2012/13 (SeRCOP)* (for example, charges are based on estimated or actual time allocations with the exception of administrative building costs – floor area basis). The total absorption costing principle is used – the full cost of overheads and support services are shared between users in proportion to the benefits received, with the exception of:

- Corporate & Democratic Core – costs relating to the Council’s status as a multi-functional, democratic organisation.
- Non Distributed Costs – the cost of discretionary benefits awarded to employees retiring early.

These two cost categories are defined in SeRCOP and accounted for as separate headings in the Comprehensive Income and Expenditure Statement, as part of Net Expenditure on Continuing Services.

PROPERTY, PLANT & EQUIPMENT

Assets that have physical substance and are held for use in the production or supply of goods and services, for rental to others, or for administrative purposes and that are expected to be used during more than one financial year are classified as Property Plant and Equipment.

Recognition:

Expenditure on the acquisition, creation or enhancement of Property, Plant and Equipment is capitalised on an accruals basis, provided that it is probable that the future economic benefits or service potential associated with the item will flow to the Council, over more than one year and that the cost of the item can be measured reliably. Expenditure that maintains but does not add to an assets potential to deliver future economic benefits or service potential (i.e. repairs and maintenance) is charged as an expense when it is incurred.

Enhancement is expenditure intended to:

- lengthen substantially the useful life of the asset,
- increase substantially the value of the asset,
- increase substantially the extent to which the asset can be used

The Council has a de-minimis of £10,000 for capital expenditure, with the exception of the purchase of motor vehicles. Where the total cost of an asset is higher than £10,000 but only part of the expenditure has occurred within a financial year, that expenditure would be included in the balance sheet even if it was below the de minimis level.

Measurement

Assets are initially measured at cost, comprising:

- the purchase price
- any costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management

The Council does not capitalise borrowing costs incurred while assets are under construction.

The cost of assets acquired other than by purchase is deemed to be its fair value, unless the acquisition does not have commercial substance (i.e. it will not lead to a variation in the cash flows of the Council). In the latter case, where an asset is acquired via an exchange, the cost of the acquisition is the carrying amount of the asset given up by the Council.

Assets are then carried in the Balance Sheet using the following measurement bases:

- Dwellings – fair value determined using the basis of existing use value for social housing (EUV-SH). The social housing discount applied in 2011/12 is 34%.
- Community assets and assets under construction –historical cost.
- Plant, Vehicles & Equipment – depreciated historical cost
- All other classes of assets – fair value, unless there is no market-based evidence of fair value because of the specialist nature of the asset. In this case fair value is estimated using the Depreciated Replacement Cost method.

Assets included in the Balance Sheet at fair value are re-valued where there have been material changes in the value, but as a minimum every five years. Valuations of property assets are carried out by the District Valuer, an external, qualified valuer, who is independent of the Council. The method of valuations is as recommended by CIPFA and in accordance with the principles and guidance notes issued by the Royal Institute of Chartered Surveyors. Operational assets constructed or acquired during the year will be re-valued on 1 April of the following year.

Increases as a result of revaluations are debited to the appropriate asset account, with the opposite entry going to the Revaluation Reserve to recognise unrealised gains, except to the extent where it reverses a previous revaluation loss that was charged to a service revenue account within the Comprehensive Income & Expenditure Statement. In this case the revaluation gain will first be used to offset the previous loss and any further gain is then taken to the Revaluation Reserve. Revaluation gains charged to Surplus or Deficit on Provision of Services are transferred to the Capital Adjustment Account and reported in the Movement in Reserves Statement.

Decreases as a result of revaluation, which are not specific to one asset but affect several, are revaluation losses as opposed to impairments. The decrease is recognised in the Revaluation Reserve up to the balance in respect of each asset affected and then in Surplus or Deficit on Provision of Services. Any such charge taken to Surplus or Deficit on Provision of Services is then transferred to the Capital Adjustment Account and reported in the Movement in Reserves Statement.

The Revaluation Reserve contains revaluation gains recognised since 1 April 2007 only, the date of its formal implementation. Gains arising before that date have been consolidated into the Capital Adjustment Account.

Impairment

Assets are assessed at each year-end as to whether there is any indication that an asset may be impaired. Where indications exist and any possible differences are estimated to be material, the recoverable amount of the asset is estimated and, where this is less than the carrying amount of the asset, an impairment loss is recognised for the shortfall.

Where impairment losses are identified, they are accounted for by:

- Where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains)
- Where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement,

Where an impairment loss is reversed subsequently, the reversal is credited to the relevant service line(s) in the comprehensive Income and Expenditure Statement, up to the amount of the original loss, adjusted for depreciation that would have been charged if the loss had not been recognised.

Depreciation

Depreciation is provided for on all Property, Plant and Equipment assets by the systematic allocation of their depreciable amounts over their useful lives. An exception is made for assets without a determinable finite useful life (i.e. freehold land and certain Community Assets) and assets that are not yet available for use (i.e. assets under construction).

Depreciation is calculated on the following bases:

- Land is not depreciated as it will not have a finite life.
- Council Dwellings and Other Buildings are depreciated using the straight line method. The finite useful life is assessed by the District Valuer at the time of revaluation but for Council Dwellings is usually 50 years, and for other buildings is between 1 and 60 years.

- Plant & Equipment are also depreciated by the straight line method. Useful life is assessed by the Chief Finance Officer at the time of acquisition, usually between 3 and 10 years. Some assets have a longer life span, up to 30 years.
- Vehicles are depreciated using the reducing balance method at a rate of 25% per annum.
- Non-current assets held-for sale are not depreciated.

Where an item of Property, Plant and Equipment asset has major components whose cost is significant in relation to the total cost of the item, the components are depreciated separately.

Revaluation gains are also depreciated with an amount equal to the difference between current value depreciation charged on assets and the depreciation that would have been chargeable based on their historic cost being transferred each year from the Revaluation Reserve to the Capital Adjustment Account..

Componentisation:

Only assets with a carrying amount more than or equal to £500,000 at the beginning of the financial year are considered for componentisation. To be recognised as a component the value of the part of the asset being considered must be more than or equal to 10% of the value of the asset, and have a life less than or equal to half that of the main asset. When a component is replaced, the carrying amount of the old component is derecognised and the new component is recognised. If the carrying amount of the old component is not known, this is estimated by indexing back from the cost of the new component and adjusting for depreciation and impairment over the old component's useful life. The Building Costs Index will be used.

The depreciation calculated is charged to the service revenue accounts, central support service accounts and trading accounts.

Revaluation gains are also depreciated, with an amount equal to the difference between current value depreciation charged on assets and the depreciation that would have been chargeable based on their historical cost being transferred each year from the Revaluation Reserve to the Capital Adjustment Account.

Depreciation charges for non-housing assets are not proper charges to the General Fund, so are transferred to the Capital Adjustment Account and reported in the Movement in Reserves Statement. Depreciation charges for HRA dwellings that are covered by the Major Repairs Allowance (MRA) are real charges and are included in the Comprehensive Income & Expenditure Statement. If the depreciation charged is higher than MRA, an amount equal to the difference is transferred to the HRA from the Major Repairs Reserve. If the depreciation charged is lower than MRA the transfer is from the HRA to the reserve. These transactions are reported in the Movement in Reserves Statement.

Disposals and Non-current Assets Held for Sale

When it becomes probable that the carrying amount of an asset will be recovered principally through a sale transaction rather than through its continuing use, it is classified as an Asset Held for Sale. The asset is revalued immediately before reclassification and then carried at the lower of this amount and fair value less costs to sell. Where there is a subsequent decrease to a fair value less costs to sell, the loss is posted in the Other Operating Expenditure line in the Comprehensive Income and Expenditure statement. Gains in fair value are recognised only up

to the amount of any previously losses recognised in the Surplus or Deficit on Provision of Services. Depreciation is not charged on Assets Held for Sale.

If assets no longer meet the criteria to be classified as Assets Held for Sale, they are reclassified back to non-current assets and valued at the lower of their carrying amount before they were classified as held for sale; adjusted for depreciation, amortisation or revaluations that would have been recognised had they not been classified as Held for Sale, and their recoverable amount at the date of the decision not to sell.

Assets that are to be abandoned or scrapped are not reclassified as Assets Held for Sale.

When an asset is disposed of or decommissioned, the carrying amount of the asset in the Balance Sheet (whether Property, Plant and Equipment or Assets Held for Sale) is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Receipts from disposals (if any) are credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of disposal). Any revaluation gains accumulated for the asset in the Revaluation Reserve are transferred to the Capital Adjustment Account.

Amounts for a disposal in excess of £10,000 are categorised as capital receipts. A proportion of receipts related to housing disposals (75% for dwellings, 50% for land and other assets, net of statutory deductions and allowances) is payable to the Government. The balance of receipts is required to be credited to the Capital Receipts Reserve, and can then only be used for new capital investment or set aside to reduce the Council's underlying need to borrow (the capital financing requirement). Receipts are appropriated to the Reserve from the General Fund Balance in the Movement in Reserves Statement.

The written-off value of disposals is not a charge against council tax, as the cost of non-current assets is fully provided for under separate arrangements for capital financing. Amounts are appropriated to the Capital Adjustment Account from the General Fund Balance in the Movement in Reserves Statement.

XVI. PROVISIONS, CONTINGENT ASSETS AND CONTINGENT LIABILITIES

Provisions:

Provisions are made where an event has taken place that gives the Council a legal or constructive obligation that probably requires settlement by a transfer of economic benefits or service potential, and a reliable estimate can be made of the amount of the obligation. For instance the Council may be involved in a court case that could eventually result in the making of a settlement or the payment of compensation.

Provisions are charged as an expense to the appropriate service line in the Comprehensive Income and Expenditure Statement in the year that the Council becomes aware of the obligation, and are measured at the best estimate at the balance sheet date of the expenditure required to settle the obligation, taking into account relevant risks and uncertainties

When payments are eventually made, they are charged to the provision carried in the Balance Sheet. Estimated settlements are reviewed at the end of each financial year-where it becomes less than probable that a transfer of economic benefits will now be required (or a lower settlement than anticipated is made), the provision is reversed and credited back to the relevant service.

Where some or all of the payment required to settle a provision is expected to be recovered from another party (e.g. from an insurance claim), this is only recognised as income for the relevant service if it is virtually certain that reimbursement will be received if the obligation is settled.

The council has made a provision for settling the self-insured element of Public Liability insurance claims.

Contingent Liabilities

A contingent Liability arises where an event has taken place that gives the Council a possible obligation whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council. Contingent Liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that an outflow of resources will be required or the amount of the obligation cannot be measured reliably.

Contingent liabilities are not recognised in the Balance Sheet but disclosed in a note to the accounts.

Contingent Assets

A contingent Asset arises where an event has taken place that gives the Council a possible asset whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council.

Contingent assets are not recognised in the Balance Sheet but disclosed in a note to the accounts where it is probable that there will be an inflow of economic benefits or service potential.

XVII. RESERVES

The Council sets aside specific amounts as reserves for future policy purposes or to cover contingencies. Reserves are created by appropriating amounts out of the General Fund Balance in the Movement in Reserves Statement. When expenditure to be financed from a reserve is incurred, it is charged to the appropriate service in that year to score against the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement. The reserve is then appropriated back into the General Fund Balance in the Movement in Reserves Statement so that there is no net charge against council tax for the expenditure.

Certain reserves are kept to manage the accounting processes e.g. for non-current assets, retirement and employee benefits and do not represent usable resources for the council – these reserves are explained in the relevant policies.

XVIII. REVENUE EXPENDITURE FUNDED FROM CAPITAL UNDER STATUTE

Expenditure incurred during the year that may be capitalised under statutory provisions but that does not result in the creation of a non-current asset has been charged as expenditure to the relevant service in the Comprehensive Income and Expenditure Statement in the year. Where the Council has determined to meet the cost of this expenditure from existing capital resources or by borrowing, a transfer in the Movement in Reserves Statement from the General Fund Balancer to the Capital Adjustment Account then reverses out the amounts charged so that there is no impact on the level of council tax.

XIX. VAT

Income and expenditure excludes any amounts related to VAT, as in the main VAT collected is payable to HM Revenue & Customs and VAT paid is recoverable from them. VAT is included as an expense only to the extent that it is not recoverable from Her Majesty's Revenue and Customs. VAT receivable is excluded from income

XX. PRINCIPAL & AGENT TRANSACTIONS

In its capacity as a billing authority the Council acts as an agent - council tax income is collected and distributed by the Council both on its own behalf and as an agent for Lincolnshire County Council and Lincolnshire Police Authority. Non Domestic Rate (NDR) income is collected on behalf of the Government.

Where the Council is acting as an agent, transactions are not reflected in the financial statements, except where cash is collected or expenditure is incurred on behalf of the other bodies. In this case a debtor or creditor will be raised.

Council Tax income is included in the Comprehensive Income & Expenditure Account on an accruals basis.
