

# Joint Meeting of the Environment Overview and Scrutiny Committee and Rural and Communities Overview and Scrutiny Committee

SOUTH  
KESTEVEN  
DISTRICT  
COUNCIL

## Extraordinary Meeting

---

Tuesday, 15 November 2022 at 2.00 pm  
Council Chamber – South Kesteven House, St. Peter's Hill,  
Grantham. NG31 6PZ

---

**Committee Members:** Councillor Richard Cleaver, Councillor John Cottier, Councillor Richard Dixon-Warren, Councillor Barry Dobson, Councillor Ben Green, Councillor Gloria Johnson, Councillor Nikki Manterfield, Councillor Penny Milnes, Councillor Sarah Trotter, Councillor Hilary Westropp, Councillor Hannah Westropp, Councillor Ray Wootten and 2 Vacancies (Alliance SK)

---

# Agenda

**1. Apologies for absence**

**2. Disclosure of interests**

Members are asked to disclose any interests in matters for consideration at the meeting.

**3. Grounds Maintenance - Future Arrangements**

(Pages 3 - 18)

To provide information to Members on the results of the grounds maintenance options appraisal undertaken, and in consideration, provide a recommendation to Cabinet on the preferred way forward.

This page is intentionally left blank

**SOUTH  
KESTEVEN

COUNCIL**

## **Joint Meeting – Environment and Rural and Communities Overview and Scrutiny Committees**

15 November 2022

Report of Councillor Mark Whittington  
Cabinet Portfolio Holder for  
Waste and Climate Change

## **Conclusion of the Grounds Maintenance Options Appraisal**

### **Report Author**

Karen Whitfield, Assistant Director of Culture and Leisure

 Karen.whitfield@southkesteven.gov.uk

### **Purpose of Report**

To provide information to Members on the results of the grounds maintenance options appraisal undertaken, and in consideration, provide a recommendation to Cabinet on the preferred way forward.

### **Recommendations**

**The Joint Environment Overview and Scrutiny Committee and Rural and Communities Overview and Scrutiny Committee is asked to:**

- 1. Recommend to Cabinet the proposed changes to the grounds maintenance specification as detailed in Exempt Appendix Two, Amended Grounds Maintenance Specification and Associated Savings, are adopted.**
- 2. Recommend to Cabinet the Council's grounds maintenance service be insourced from 1 March 2023 following TUPE consultation with the existing employees of EnvironmentSK Ltd, with the report to be considered by Cabinet to include an Equality Impact Assessment.**
- 3. Further recommends to Cabinet that once insourced, the Council's grounds maintenance service should be integrated with Street Scene and the Big Clean Team, such integration taking place as soon as possible during 2023.**

4. **Recommend a report should be presented to Companies Committee at the earliest opportunity to consider the dissolving of the Council’s wholly-owned company, EnvironmentSK Ltd.**

<b>Decision Information</b>	
Does the report contain any exempt or confidential information not for publication?	Appendices One and Two are not for publication by virtue of paragraph 3 of Part 1 of Schedule 12A of the Local Government Act 1972.
What are the relevant corporate priorities?	Housing that meets the needs of all residents Healthy and strong communities Clean and sustainable environment High performing Council
Which wards are impacted?	All

## **1. Implications**

Taking into consideration implications relating to finance and procurement, legal and governance, risk and mitigation, health and safety, diversity and inclusion, safeguarding, staffing, community safety, mental health and wellbeing and the impact on the Council’s declaration of a climate change emergency, the following implications have been identified:

### ***Finance and Procurement***

- 1.1 The Council has a significant responsibility in relation to the grounds maintenance of General Fund and HRA land, in the current financial year this is projected to cost over £1m. A new grounds maintenance specification has been developed which, if adopted, would add a budget pressure of circa £384k for financial year 2023/2024. This represents an increase of 37%.
- 1.2 The Council is already facing significant financial challenges to deliver a balanced budget position for 2023/2024 and beyond, currently there are significant budget pressures in relation to utilities, the pay award, and fuel. A further financial pressure of £384k is not affordable without equivalent budgetary savings being identified in other areas.
- 1.3 Changes are being proposed to the grounds maintenance specification which was developed earlier this year which, if approved, will provide a more affordable position for the Council whilst ensuring the continuation of high levels of service delivery.

- 1.4 A thorough options appraisal has been undertaken to work through the options previously agreed. Following a lack of interest from the market this work has since focused on EnvironmentSK Ltd continuing to provide the service and also to explore the opportunity to insource the service and integrate this with the Street Scene service which currently has an annual budget of £1.4m.
- 1.5 Financial modelling has identified that, in addition to the savings resulting from an amended grounds maintenance specification, further savings of circa £352k can be achieved in 2023/2024 by insourcing the grounds maintenance service and integrating this with Street Scene and the Big Clean Team. If the recommendations within this report are supported these savings will contribute towards the Council's aim of achieving a balanced financial position for 2023/2024.
- 1.6 Once full integration of the two services has been completed, further opportunities will be explored with the aim of identifying further cost savings and generating additional income from financial year 2024/2025 onwards.

**Completed by: Richard Wyles, Chief Finance Officer and s151 Officer.**

#### ***Legal and Governance***

- 1.7 It is appropriate for the Council to review how best to deliver its grounds maintenance service. A thorough options appraisal has been carried out which provides Members with a sound basis to decide on the future delivery of the service.

**Completed by Graham Watts, Assistant Director of Governance and Deputy Monitoring Officer**

#### ***Risk and Mitigation***

- 1.8 Once a final decision has been made on how the Council's grounds maintenance service will be delivered in the future a project plan will be developed to support the transition. This will include a risk register to identify any risks and mitigating actions. This will be monitored and kept under review by the project team.

**Completed by: Tracey Elliot, Governance and Risk Officer**

#### ***Health and Safety***

- 1.9 The Council has a duty under the Health and Safety at Work Act 1974 to protect the health, safety and welfare of its employees and other people who may be affected by its work activities.
- 1.10 Providing a grounds maintenance service involves the use of heavy and light machinery and harmful chemicals. Should the grounds maintenance service be insourced corporate support will be provided to ensure there are suitable and

sufficient policies and procedures in place to ensure safe and robust working practices are adhered to, and activities have been sufficiently risk assessed.

- 1.11 A training plan will be required to identify any necessary training resulting from an integrated Street Scene and grounds maintenance service. Employees will require full training before operating any new machinery or taking on additional duties, and records will need to be maintained in this regard.

**Completed by Phil Swinton, Emergency Planning and Health and Safety Lead**

***Diversity and Inclusion***

- 1.12 Insourcing this operation will impact on the people currently employed through EnvironmentSK Ltd. Whilst some of the impact experienced will be positive, we must consider any negative impact resulting from these changes.
- 1.13 Human resources implications will be considered by the HR professionals under TUPE regulations, but further consideration is required in relation to equality and inclusivity. It is recommended that such equality considerations be included into any consultation process undertaken as part of the proposed changes to how this service will be staffed and delivered should the proposed changes be adopted.
- 1.14 All reasonable adjustments required should be considered at the earliest stage to ensure they are integral to the whole process. These adjustments could relate to the consultation process, making it equitable for all, through to any changes in roles and responsibilities resulting from the proposed integration of grounds maintenance into Street Scene.
- 1.15 It is recommended that a full Equality Impact Assessment is undertaken and presented to Cabinet for consideration as part of the final decision on the future of the service. This will ensure the equality, diversity and inclusion needs of all staff impacted by these proposed changes are fully considered and mitigated.

**Completed by: Carol Drury, Community Engagement Manager**

***Human Resources***

- 1.16 Should the grounds maintenance service be insourced, the Council and EnvironmentSK Ltd will have individual roles and responsibilities to fulfil under TUPE Regulations. Should due process not be followed there is the potential for significant financial penalties on either side. Therefore, it will be necessary for EnvironmentSK Ltd to secure independent specialist HR support to ensure that all necessary steps and procedures are followed.

- 1.17 Should the decision be made to integrate an insourced grounds maintenance service with Street Scene and the Big Clean Team, a consultation plan will be developed, and the Council's HR Team will support colleagues to ensure a thorough consultation is undertaken with the affected employees.

**Completed by Fran Beckitt, Human Resources Manager**

### ***Climate Change***

- 1.18 The insourcing of the Council's grounds maintenance service, including wider integration with Street Scene and the Big Clean Team presents an opportunity to fully integrate the service and the tasks undertaken. This has the potential to reduce use of vehicles and associated fuel and rationalise necessary mileage, which as well as resulting in financial efficiencies will reduce the Council's carbon footprint.

**Completed by Serena Brown, Sustainability and Climate Change Officer.**

### ***Consultation***

- 1.19 A comprehensive consultation will be undertaken with all tenants within areas maintained by the Housing Revenue Account seeking their views on the proposed changes to the service provided. This will be completed alongside any consultation necessary around the potential introduction of service charges for services provided.

**Completed by Craig Spence, Assistant Director of Housing**

## **2. Background to the Report**

- 2.1 The provision of a high-quality grounds maintenance services satisfies many of the Council's key priorities as identified within its Corporate Plan 2020-23. These include being a 'High Performing Council' with a focus on managing finances and assets effectively, and 'Providing a Clean and Sustainable Environment', and ensuring that the district is a clean and pleasant place to live and visit.
- 2.2 To ensure a high level of service can be delivered, a review of the grounds maintenance service has been undertaken with a view to establishing whether the current method of delivery is the optimal model, or whether there are alternative options which better align with the Council's vision and priorities.
- 2.3 The district of South Kesteven covers 365 square miles, the Council being responsible for the grounds maintenance of all Council-owned land including General Fund (GF) and Housing Revenue Account (HRA) land. In addition, closed churchyards and sports pitches are maintained and the grass verges in Grantham are cut on behalf of Lincolnshire County Council.

- 2.4 The total amount of land currently maintained across the district equates to 1.5 million square metres. For financial year 2022/2023 the projected total contract fee to EnvironmentSK Ltd is £1.016M, this being split £428,000 HRA and £588,000 GF.
- 2.5 Since 1 March 2019, the Council's grounds maintenance service has been provided by EnvironmentSK Ltd, a wholly-owned Council company. Prior to this, the Council had a contract with Glendale Ltd, which commenced in 2014 and ended in 2019.
- 2.6 The Council is receiving a very good standard of service from EnvironmentSK Ltd, which represents a significant improvement on the previous arrangement. However, there has been a history of the Council under-funding EnvironmentSK Ltd for the work undertaken, resulting from out of date and inaccurate core data, which has presented operational difficulties.
- 2.7 A fundamental review of the Council's land and grounds maintenance responsibilities has been undertaken which has resulted in a new grounds maintenance specification being developed. This contains accurate information on the sites to be maintained, and detailed information on the Council's requirements at each location.
- 2.8 To accompany the new specification a digital mapping system has been developed which contains detailed information on each location including measurements, details of legal ownership, and the level and frequency of grounds maintenance tasks to be undertaken.
- 2.9 Three options for the future provision of grounds maintenance services have been identified, these being:
- To retain the services of EnvironmentSK Ltd
  - To secure an external provider under a contract arrangement
  - To insource the grounds maintenance service, including integration with wider Council services.
- 2.10 At a joint meeting of the Environment Overview and Scrutiny Committee and Rural and Communities Overview and Scrutiny Committee held on 27 June 2022, Members considered and approved the three options, and recommended to Cabinet a procurement exercise be undertaken to assist an assessment of the future delivery options.
- 2.11 At a subsequent meeting of Cabinet on 12 July 2022, Cabinet approved the following:

- The commencement of a procurement process in order to seek proposals from providers of grounds maintenance services, to assess the future delivery options.
- The commencement of a full appraisal of alternative delivery models of the grounds maintenance service, in order that a final option could be presented to Cabinet that delivers the right quality for the best value to the Council and its housing tenants.

### **Market Provider**

- 2.12 Following the decision made by Cabinet on 12 July 2022, a mini competition was launched on the Eastern Shires Purchasing Organisation (ESPO) framework (Lot 245\_21) on 21 July 2022 with the closing date for submissions being 30 August 2022. The proposed contract term was for five years with the potential to extend the arrangement for a maximum additional two years. The grounds maintenance specification formed the basis of the procurement opportunity including a detailed pricing schedule for contractors to complete.
- 2.13 There are a total of 14 operators on the ESPO framework for grounds maintenance services. All had the opportunity to submit clarification questions on the specification, contract term or pricing schedule, prior to submitting a tender price for the work.
- 2.14 The tender opportunity did not generate any significant interest, and it was clear from the clarification questions received, the market had little confidence the Council intended to award a commercial contract. As a result, the tender opportunity was withdrawn on 15 August 2022.
- 2.15 Since the withdrawal of the tender opportunity, work has continued concentrating on the remaining options available to the Council, being:
- A continuation of the current arrangements with EnvironmentSK Ltd.
  - Insourcing the grounds maintenance service, including integration with existing Council services.

### **EnvironmentSK Ltd**

- 2.16 EnvironmentSK Ltd has provided an updated annual fee for delivering the service for 2023/2024 using the pricing schedule which had been prepared to accompany the revised grounds maintenance specification. As a result, the total cost has been identified should EnvironmentSK Ltd continue to provide the service. A breakdown of the costings is provided in **Exempt Appendix One**, ESK Pricing Schedule.
- 2.17 The cost identified represents an increase of £384,00 or 37% increase when compared to the 2023/2024 indicative budget. The increase in pricing relates to:
- Increased operating costs in relation to fuel, utilities and staffing costs
  - The under-pricing of the previous specification

- 2.18 An allowance of 6% for inflation has been included in the cost which relates to financial year 2023/2024 only. No provision for replacement vehicle costs has been included, further investment would be due in 2026/2027, and would need to be financed by a further loan should the Council's current arrangement with EnvironmentSK Ltd continue.

### **Revised Specification**

- 2.19 Given the Council's challenging financial circumstances, further work has been undertaken in collaboration with EnvironmentSK Ltd to identify a range of options to amend the services specification and provide a level of savings that would avoid the budgetary pressure identified.
- 2.20 Whilst undertaking this review, careful consideration has been given to ensuring the standard of service provided would remain high to mitigate any impact on the district's appearance or the Council's reputation. A detailed breakdown of the savings and impact on service delivery is provided in **Exempt Appendix Two** (titled - Amended Grounds Maintenance Specification and Associated Savings), should EnvironmentSK Ltd be retained to deliver the grounds maintenance service.

### **Insourcing and Integration**

- 2.21 As an alternative to the continuation of EnvironmentSK Ltd delivering the service, a further option of insourcing the service has been explored. Fundamentally, this avoids the need for the Council to continue to retain EnvironmentSK Ltd as a commercial company, which in itself will reduce operating costs. However, due to the complexities around insourcing the grounds maintenance service and integration with other services, it is proposed a two phased approach is introduced as follows:

- **Phase 1** - Insourcing the grounds maintenance service and adopting the revised specification from March 2023.
- **Phase 2** - Insourcing the service, adopting the new specification from April 2023 and implementing integration with Street Scene and the Big Clean Team from May 2023 onwards.

### **Phase 1 – Insourcing the Grounds Maintenance Service**

- 2.22 To establish the costs of a standalone insourced grounds maintenance service, financial modelling has taken place to identify the additional salary and pension costs, and the savings which would be provided by not maintaining and administering a separate company. This has identified an overall saving in the region of £152,000 should the Council insource the grounds maintenance service. This projected saving takes into consideration the cost increase following the migration of EnvironmentSK Ltd staff onto the Council's terms and conditions. However, the full saving can only be realised upon the surrendering of the current operating location and integrating the service operation into the current depot at Alexandra Road, Grantham. Should there be a requirement to continue to deliver the grounds maintenance service from a different location then it is likely new costs

will be required which will reduce the £152,000 saving. Further work in respect of this element is ongoing and will be concluded before any insourcing is commenced.

- 2.23 Under an insourcing arrangement, the current employees of EnvironmentSK Ltd would transfer to the Council under Transfer of Undertakings (Protection of Employment) Regulations 2006 (TUPE). Under TUPE Regulations the transferring employees have protected rights and would be fully consulted on the proposed change in employer.
- 2.24 TUPE Regulations provide that transferring employees transfer to a new employer on their existing terms and conditions, their length of service also being protected. However, receiving employers can propose to make changes to the employees' terms and conditions if these represent an improvement, and if the employees are fully consulted and agree to the proposed changes.
- 2.25 The savings identified at paragraph 2.22 include harmonisation of the transferring employees onto Council terms and conditions. This includes adopting Council pay grades, a reduction in the weekly hours worked from 40 to 37, and an increased holiday allowance. The transferring employees would also benefit for being able to join the Local Government Pension Scheme. As well as ensuring they are remunerated and rewarded appropriately for their work, this will also aid the recruitment and retention of staff which has proved difficult in the past.
- 2.26 It is proposed that should a final decision be made to insource the grounds maintenance service in December 2022, TUPE consultations could commence immediately, and the service be fully insourced by 1 March 2023. Delivery of the new grounds maintenance specification could begin immediately thereafter.

## **Phase 2 – Insourcing the Service and Integration with Street Scene**

- 2.27 Using the baseline costs of insourcing the Council's grounds maintenance service, further work is ongoing to identify the impact of integrating the service with Street Scene including the Big Clean Team. This currently includes:
- Identifying the current level of service being delivered by Street Scene and the Big Clean Team.
  - Identifying the split of resources, including staffing and finance, between Street Scene and Waste Services.
  - Developing a services specification for Street Scene and Big Clean.
  - Merging the specifications for grounds maintenance and Street Scene to a resource plan in relation to staffing, vehicles and equipment.
  - Identifying the required management structure for an integrated service.
  - Developing service performance standards.

- 2.28 The aim of this work is to identify further savings resulting from a full integration of the grounds maintenance and Street Scene services. To date efficiencies have been identified in relation to:
- A reduction in the number of vehicles required
  - Workforce efficiencies, a larger team would provide flexibility and avoid a reliance on temporary seasonal staff and agency workers
  - Enhanced training for the team could negate the use of tree specialists for smaller tree works
  - Opportunities around commercialisation of services
- 2.29 The current budget for Street Scene and Big Clean is £1.4m. Financial modelling undertaken to date has established that a reasonable first year saving of £200,000 will be achieved should Street Scene and the Big Clean Team be integrated with an insourced grounds maintenance service.
- 2.30 Together with the savings previously identified in relation to insourcing the grounds maintenance service, a total projected saving of £352,000 could be achieved in financial year 2023/2024 from an integration of the services.

### **3. Key Considerations**

- 3.1 Insourcing the grounds maintenance service would provide the Council with full operational control over how the service is delivered. The service could be increased or reduced in line with service requirements, and take account of seasonal fluctuations, without incurring any contractual penalties or additional costs.
- 3.2 The timeline of insourcing the grounds maintenance service by 1 March 2023 has been identified to be the optimal time, as this would ensure the changes are in place before the grass cutting season begins. Grass cutting represents a significant part of the grounds maintenance undertaken and a first cut of the grass in Spring is very important to ensure it can be maintained to a good standard for the rest of the year.
- 3.3 In addition to the necessary TUPE consultation with the current employees of EnvironmentSK Ltd, an integration of the two services would also require consultation with the existing Council employees in Street Scene. In line with Council procedures, a consultation plan will be developed with support from the Council's HR team and affected employees will be fully consulted on the proposed changes.
- 3.3 Options are being explored to introduce charging for HRA assisted gardens and communal area maintenance. Any changes proposed to the service would require full consultation with the Council's tenants.

### **4. Other Options Considered**

- 4.1 A full explanation of the options considered has been provided in the body of this report.

## **5. Reasons for the Recommendations**

- 5.1 The revised grounds maintenance specification, including the proposed amendments, represents a high-quality and affordable level of service for the Council.
- 5.2 The results of the options appraisal undertaken has identified that insourcing the grounds maintenance service would provide the Council with full control of the service, including operational flexibility to deal with reactive works and seasonal demands. In addition, this will deliver a financial saving for the Council.
- 5.3 It has been identified that the level of savings achieved from insourcing the grounds maintenance service would be further increased should the service be integrated with Street Scene and the Big Clean Team. An integration of the services would provide the Council with further operational flexibility resulting from the employment of a multi skilled workforce, and a reduction in the number of separate journeys to sites, thereby contributing to the Council's commitment to reduce carbon emissions.
- 5.4 It is recommended that, prior to Cabinet making a decision, a report is presented to Companies Committee for Members to consider the implications of dissolving EnvironmentSK Ltd.

## **6. Background Papers**

- 6.1 Grounds Maintenance Options Appraisal Report presented to Joint Scrutiny Meeting of Environment Overview and Scrutiny Committee and Rural and Communities Overview and Scrutiny Committee on 27 June 2022.
