

Water Usage – Cost Data Only

Specific water metered data is also not available and steps to improve the quality of data are being explored as part of the carbon emission monitoring project. However, cost data is available. The cost of water usage for Q1 of 2020/21 projects a lower usage than both previous financial years (£65,801.64), unfortunately though, without accurate metered water data this is not possible to confirm. Whilst water is included in the Council’s carbon footprint monitoring, a proxy is used to calculate volume of water used in Council buildings.

Financial Year	2018/19	2019/20	2020/21 (Q1 only)
Cost	£71,674.36	£74,814.72	£16,450.41

Fixed Penalty Notices

Fixed Penalty Notices are issued for a range of offences including fly tipping, litter and parking. A significant increase in the number of notices issued followed the responsibility for parking enforcement being brought back into Council responsibility in October 2019. In Quarter 1 of 2020/21 very few notices were issued as a result of the wider public behaviour changes caused by COVID 19.
