Commentary :

The 2019/20 financial year saw a xx% increase/decrease in overall carbon emissions compared to the baseline year of 2018/19. Particular reductions were seen from xxxx due to xxxx. Projects implemented in 2019/20 include xxxx and xxxx which will contribute to a reduction in overall carbon emissions. xxxx remain a large contributor of carbon emissions to the overall SKDC footprint, and further work should look to focus on this area in order to ensure carbon reductions.

Total CO2e Tonnes - Quarterly (Major Contributors*)

*This graphic does not include some factors due to the difficulty in calculating their quarterly impact on the CO2e emissions. Those include water, refrigerants and renewable energy generations. They are included in the total annual footprint.
