

Appendix A: Outlined SKDC managed sites including tree planting proposals

The below costs for trees are based on previous purchases by SKDC from a UK based supplier of young trees. The species and tree girth have not yet been determined and are dependent on the context of the sites identified, therefore average costs have been suggested:

Tree supply and planting with stakes and ties £160 - £200 per tree

It is strongly recommended that saplings planted are reasonably mature given the planting context in amenity land. These spaces are often used for dog walking and as play spaces, which can have an impact on immature saplings and result in trees not surviving to maturity.

Young trees approx. 2 – 3m tall with Stem circumference (girth):

Tree Girth	(cm)
10 – 12	3.5
12 – 14	4.1

The below costs include checking and irrigation as required during the first growing year of £140 – £250 per location. This can vary greatly, and the assumption has been made it that it will be an average year with average temperatures, rainfall etc.

Average cost of tree	£180
Average cost of maintenance in first year	£195
TOTAL	£375

The corresponding cost for 20 trees including maintenance is as follows.

Allocation of 20 trees per site	£7500
TOTAL cost for 4 sites	£30,000

Proposed sites for consideration are included below:

Grantham

Gonerby Hill Foot Play area - approximate location for new trees within black penned area: <https://goo.gl/maps/kznXjwE8uffK1QUWA>

Stamford

Foxglove Road play area - approximate location for new trees within black panned area: <https://goo.gl/maps/VXv8TMCpSwqRYWpM6>

Market Deeping

Tattershall Drive- approximate location for new trees within black panned area: <https://goo.gl/maps/L6eNM5AtK7KVRv3W7>

Bourne

Rochester Drive - approximate location for new trees within black penned area:
