Gender Pay Gap Report 2021

Presented By
Sam Fitt, Project Lead

Background to the report

In 2017 the government introduced legislation requiring all organisations with more than 250 employees to publish their gender pay gap each year. The gender pay gap shows the difference in mean and median of both hourly pay and bonus payments for men and women across the organisation. This differs from equal pay which considers the difference in pay of men and women in roles of equal value.

The information contained within this report is for the snapshot date of 31 March 2021 (as per the regulations).
