

| URN | Applicant | Location | Funding Ask | Brief description |
|---------|--|----------------|-------------|---|
| SKMP25 | Harrowby United FC | Grantham | £65,000 | Complete refurbishment of the changing rooms situated on Harrowby Lane in Grantham. These changing rooms used to provide much needed sports facilities to grassroots adult and youth football. In 2019 these were vandalised and have been closed ever since. We propose a full renovation project to bring these back into use for the local community groups, serving the local area and promoting active sports programmes. |
| RF-1027 | The Side House Coffee Shop | Claypole | £10,000 | Purpose built kitchen unit to be able to bake all of our cake and traybake products to keep up with high demand. Currently everything is produced with one domestic oven, in house, which is proving more challenging as we are constantly getting busier. This extra space will enable us to focus solely on customer orders in house, and all the baking will be done in the kitchen unit off site. |
| RF-1029 | Wigwam Holidays Millside | Grantham | £8,358 | Seeking assistance to purchase a further two hot tubs, but these are to be wood fired ones. They will provide a different experience to the electric ones whilst running on a sustainable energy source. Demonstrable demand for hot tubs, so an additional two will boost both booking numbers and value. These additional visitors will also increase local economy spend, at places such as The Stag public house, Syston Park farm shop and Belton House, as these are well supported by existing guests. |
| SK-2173 | Deepings Neighbourhood Plan Group/ Deeping St James Parish Council | Deepings | £21,600 | New east-west path through John Eve Field (broadly following public right of way, MaDe/4/2). Creation of hardened all-weather surface footpath, 180m length. The field was donated to the Town Council by John Eve, a local farmer. Whilst some hardened paths exist, they do not offer an east -west route. This new route will provide an all-weather route to connect pedestrians via Church, and cemetery on the west, to schools and supermarket on the east side of the park. |
| SK-2204 | SKDC Arts Centres | South Kesteven | £10,500 | The project brings "The Whale," an 18ft spectacle created by the renowned Circo Rum Ba Ba, to two locations: Deepings and Grantham. Over a span of 6 days—3 in each location—this unique installation will offer a captivating, immersive experience for the public. The Whale will run Friday - Sunday, with the Friday being for school class and nursery bookings. |

| | | | | |
|---------|---------------------------------|----------------|----------|--|
| | | | | "The Whale" promises to deliver a memorable and impactful experience, blending entertainment and education in an innovative and delightful manner.. |
| SK-2205 | South Kesteven District Council | Grantham | £100,000 | This project aims to benefit all residents of South Kesteven that utilise the play areas by ensuring they have access to high quality play areas in key locations and equipment that is fit for purpose. Over recent years there have been occasions where equipment has been removed due to it posing a health and safety risk and being beyond economical repair. It is for this reason that this project is so important as it will contribute towards replacing these pieces of equipment in these much-loved play areas in the following play areas: Troughton Walk South Witham, Empingham Road Stamford, Arnoldfield, Grantham, College Close Stamford. |
| SK-2206 | Lindissi CIC | Grantham | £6,500 | An ongoing project to bring the prehistory of South Kesteven to life. The organisation has already held a stone age festival in Wyndham Park and a week of free family activities in the Earlesfield estate. Future events will bring family activities to the Harrowby estate, an autumn fun day and a spring festival. |
| SK-2208 | South Witham Parish Council | South Witham | £7,800 | A new replacement flat roof for South Witham village hall. This building is owned by the Parish Council and therefore is responsible for ensuring the facility is fit for purpose. The flat roof section of the roof is severely water damaged/ rotten and is affecting the fabric of the building. This has led to severe ingress water damage in the various rooms/ corridor. (damage photos to forward on email) Expert advice given is to replace rather than repair, to future proof the building. The village hall is a great asset to the village, it is regularly used by numerous groups and clubs and hired out for functions such as weddings, birthdays etc. |
| SK-2209 | St Guthlac's PCC Market Deeping | Market Deeping | £38,510 | <p>To be more attractive to community groups we are proposing projects that involves improving the Green School, which acts as the church hall for St Guthlac's in the parish of Market Deeping, by replacing and enlarging the existing kitchen (over 25 years old) and replacing the toilets so they meet the current requirements for disabled access.</p> <p>The current kitchen has no cooking facilities, which restricts its usefulness to the community, and is very small. Some of the existing units are broken and cannot be used.</p> <p>Although there is a disabled toilet, with baby-changing facilities, this is inaccessible by anyone using a wheelchair or pram. Monthly the church now runs Messy Church which is an activity for young families. Other groups that meet regularly include senior fitness class, community cafe, U3A history group, Mothers' Union, a children's play session, Ladies Guild, Glebe Singers and a crafting group.</p> |

|---------|---|----------|---------|--|
| SK-2213 | Heydour with Aisby & Oasby Parish Council | Sleaford | £21,000 | Heydour, Aisby and Oasby Parish Council have a plan to replace the play equipment in their play area that is currently approaching 25 years old and because the wooden structure is starting to become unsafe for the children of the villages and those that visit with their grandparents. Due to the nature of the wood structures the council wants to start the project before the equipment becomes fatigued and families must travel a distance to other villages to engage in outdoor activities. It will also benefit all the villages in the parish and the wider communities that don't have an outdoor area to enjoy. The Council owns a tiny plot of land for the play equipment but is lucky to have a village hall and the Millennium Green attached with them all using the same car park. When any of the parties hold community events having the new equipment will be positive, allowing children a safe place to play. |
| SK-2214 | FULBECK SPORTS & SOCIAL CLUB | Grantham | £22,900 | We would like to carry out some building improvements to make our Sports & Social Club more accessible to disabled users by installing wider doors and new toilet facilities suitable for disabled users. We need to install new secure UPVC double glazed French doors with fire exit panic bars to the bar area. This will give access to people in wheelchairs directly from the patio area to the bar and also the indoor sports activities such as darts and pool. We would also like to install a new half glazed entrance door to the corridor with a roof light which will brighten up the area. We have many disabled villagers who would like to frequent the sports club but are put off by the disabled facilities The club is used by villagers, sports teams, supporters, and villagers from surrounding areas as a meeting point to socialise and meet and make new friends. We have very few facilities in our village. No shop, school, post office, doctor's surgery, etc. so disabled people do need a place to socialise with other villagers. To sum up disabled villagers and disabled people and children from surrounding areas would benefit from this project. |
